

FNU Rohendhar (Ro)

rohendrr@mail.uc.edu | Cincinnati, Ohio | 513-488-5710 | linkedin.com/in/ro04/ | Available from Spring 2027

EDUCATION

Bachelor of Science, Mechanical Engineering | Minor in Engineering Project Management

Class of 2027

University of Cincinnati, Cincinnati, OH | GPA: 3.68/4.00

TECHNICAL SKILLS

CAD & Mechanical Design: Onshape, SolidWorks, Siemens NX, Creo, AutoCAD, Autodesk Inventor, Navisworks, Bluebeam

Analysis & Simulation: Finite Element Analysis (FEA), Computational Fluid Dynamics (CFD), StarCCM+

Programming & Data Analysis: Python, MATLAB, MySQL, Excel VBA (Automation & Macros), NI DIAdem, LabVIEW, AI Workflows

Productivity & Project Management: Microsoft Office 365 (Excel, PowerPoint, Word), Microsoft Project, Google Analytics, EZ Turn

PROFESSIONAL EXPERIENCE

Maintenance Engineering Intern, Nucor Nu-Iron Unlimited, Trinidad & Tobago

July 2026 – August 2026

- Improved cylinder motion by modifying hydraulic circuit design, decreasing mechanical wear and cylinder impact loading by 30% and extending component service life by 3 months.
- Diagnosed and performed root cause analysis and failure investigations on 5+ rotating equipment components, including hydraulic systems, shafts, bearings, and conveyors, as part of a 5-year reliability improvement project.

Project Engineering Co-Op, Nucor Raw Materials, Cincinnati, OH

August 2025 – December 2025

- Administered end-to-end execution and procurement for \$750k–\$1M capital projects, evaluating vendors and coordinating purchases of up to \$200k in materials while accounting for manufacturability and implementation requirements.
- Controlled and managed project budgets in Excel for multiple capital projects, tracking expenditures, forecasting cost impacts from schedule changes, and implementing strategies to minimize downtime-related expenses.
- Orchestrated as project lead for 3–4 capital projects, coordinating contractors, vendors, and internal stakeholders, and participating in design reviews and engineering modifications from concept through installation.

Project Engineering Co-Op, Nucor Raw Materials, Cincinnati, OH

January 2025 – May 2025

- Integrated a remote-operated Turning, Locking, and Braking (TLB) system on a 5,000 HP industrial driveline, transitioning hammer changeouts from hazardous manual chain-fall rigging to automated PLC-controlled positioning, eliminating pinch-point crush hazards and achieving 100% operator safety compliance.
- Commissioned high-precision equipment interfacing with PLC architectures across 9 facilities in 6 states, executing tolerance verification, troubleshooting, and hydrostatic pressure testing.
- Modeled assembly drawings, exploded views, and Bills of Materials (BOMs) supporting equipment integration and field implementation, generating engineering validation documentation.

Operations Engineering Intern, Ischebeck Titan LLC, Dubai, UAE

May 2024 – August 2024

- Expedited inventory and logistics for \$500k in construction materials, supporting on-time project execution.
- Streamlined and enforced an assembly line in manufacturing that reduced production time by 30%, enabling the team to meet delivery deadlines ahead of schedule.
- Formulated material cycling schedules and updated 2D/3D CAD layouts for "Oceanz" (a 3-tower, 50-story venture), optimizing the floor-by-floor reuse of structural equipment across construction phases.

Test Engineer Co-Op, Cummins Inc., Jamestown, NY

August 2023 – December 2023

- Collaborated with 5+ teams to validate product reliability through thorough testing, elevating cross-functional communication and engineering collaboration.
- Synthesized data analysis on 30+ datasets using Python and NI DIAdem to identify trends and support engineering decision making and product development.
- Participated in continuous improvement initiatives that increased testing efficiency by 15%, and developed 3 detailed testing documentation packages, including procedures for new systems, operating instructions, and test reports.

Lead Operations Assistant, University of Cincinnati Housing Operations, Cincinnati, OH

May 2026 – Present

- Led and supervised a team of 13 Operations Assistants across 4.3 million sq. ft. of residential facility complexes, establishing standardized workload-balancing systems and daily inspection protocols to drive cross-functional maintenance execution and campus-wide safety

HONORS & AWARDS

- University Honors Program (Top 7% of students) and UC Dean's List – University of Cincinnati
